

# Learning Assistance Services

SUNY Orange is committed to providing every student the opportunity to develop the learning skills necessary to achieve their academic, career and life goals. The College's Learning Assistance Services are provided through a combination of academic development programming that includes individualized and group learning assistance, tutoring, specialized workshops and outreach.

Students participating in Learning Assistance Services will:

- improve knowledge of subject matter
- develop effective study skills
- increase awareness and use of college services
- complete required developmental education courses in a timely manner
- achieve academic goals

## Learning Assistance Services

Library, 2nd Floor  
115 South Street  
Middletown, NY 10940  
(845) 341-4171

## When to contact Learning Assistance Services

Students should contact the Learning Assistance Services Office to ask questions about the College's academic support services, apply to be tutored, apply to be a tutor or to learn more about developmental education.

## Developmental Education

All newly admitted students are required to take the Placement Assessment test in reading, writing and mathematics. Performance on this computerized assessment determines the student's proficiency in these areas and allows SUNY Orange to place students in classes that correspond with the student's demonstrated skill level. A student may be required to take developmental courses based on their placement results. In some instances, developmental courses are prerequisites to college-level courses. In all cases, students must complete their required developmental courses.

SUNY Orange offers a variety of developmental courses for students who need to strengthen their basic skills. Students must follow specific academic policies related to these courses.

The reading, writing and math assessment tests may be re-taken, only prior to attendance in classes, with the approval of the appropriate department chairperson, (i.e., chairperson of the English Department for reading and writing, chairperson of the Mathematics Department for math) or director of Advising and Counseling.

The following developmental courses are offered at the College.

### Developmental Writing:

WRT 020 English as a Second Language (ESL) Writing  
WRT 030 Basic Writing Skills 1  
WRT 040 Basic Writing Skills 2  
ENG 101 and ENG 091 Freshman English 1 with Support Module

### Developmental Reading:

RDG 060 and RDG 061 ESL Reading with Support Module  
RDG 070 Reading and Study Skills 1  
RDG 080 Reading and Study Skills 2

### Developmental Math:

MAT 010 Developmental Arithmetic  
MAT 020 Developmental Algebra

Students placed in developmental writing and/or reading courses must be enrolled in these courses during every semester of attendance until they receive a grade of "DVP" in these courses. This passing grade must be received in these courses prior to having attempted a total of 16 non-developmental credits from the time of assessment.

Students placed in developmental math courses must complete these courses, even though there may not be a specific math requirement in their curriculum. If students have not successfully completed these courses (MAT 010 and MAT 020) by the time they have attempted 24 non-developmental credits, they must enroll in these courses every semester until they receive a grade of "DVP".

Grades of "DVP" must be received in all developmental courses into which students have been placed prior to applying for graduation.

Units earned from developmental courses are institutional in nature; they are not applicable to the 60 or more semester hours of credit required for an Associate in Arts, Associate in Science, Associate in Applied Science or any of the certificate programs.

Students who are enrolled in developmental courses may receive financial aid if they meet income eligibility requirements and have gone through the College's regular admission process. Financial aid will pay for required course work towards a student's degree or certificate. Developmental courses are considered required course work.

## Permitted Credit Courses for Students Placed in One or More Developmental Courses

Students registered in **English as a Second Language**, WRT 020, are permitted to take the following courses\*:

ART 101 Intro to Art

## Learning Resources

---

### Library

The SUNY Orange Library is designed to function as both a traditional environment of quiet study space and as a state-of-the-art information commons. The two-story library houses a variety of study spaces, including carrels for individual study, tables for group work and designed quiet-study areas.

The Information Commons is a busy, centrally located area on the first floor where students can access academic and technology resources necessary to support their learning and research. Within the Commons, the Library provides traditional research tools and reference materials, Microsoft Office software, and both wired and wireless internet access. The electronic databases provide full-text and full-image journals, magazines and newspapers. A Help Desk located adjacent to the Commons is staffed by librarians and support staff to assist students with their research needs.

Workshops and instruction sessions designed to help students acquire and improve library research skills are held in the Commons classrooms. A schedule of workshops is available online and within the Library.

The student's college identification card serves as a library card and is required to borrow books, videos and reserve readings; to utilize the computers in the Information Commons; and to access the databases from off-campus.

The Library web site (<http://sunyorange.edu/lrc>) contains detailed information regarding library services, hours, policies and instructional materials, including tip sheets designed to assist students with their research needs. For questions or reference assistance, students may call 341-4855 or 341-4260.

The College also offers Library services at the Newburgh Campus. The Newburgh Campus Library is located in Room B-1 in the Tower Building.

### Tutorial Services

Scheduled tutoring is available, upon request, for all credit students of the College and can be arranged through the Tutorial Center located on the second floor of the Library in Middletown or in TWR 122 at the Newburgh Campus. Students must have instructor approval to receive scheduled tutoring. There is a \$30 processing fee for an arranged tutoring schedule each semester in which tutoring is requested. Tutoring sessions are typically scheduled for one hour, once or twice per week per course, not to exceed 5 hours per week. Scheduling depends on tutor and student availability. Tutors also staff specialty labs on campus to assist students on a drop-in basis. There is no fee for this service in the labs.

### Biology and Health Science Learning Facilities

The BATCAVERN facilities are a learning resource for Students in the Biological Sciences and the Health Professions Programs. It is a place for students to meet for individual and small group study as well as for formal tutoring, which can be arranged at the Tutorial Center in the Library or TWR 122. The BATCAVERN facilities offer students access to a full range of anatomical models and related instructional aids including CD-ROMs, Videotapes, and review materials. Students can also access the internet and use computers offering the Microsoft Office programs Word, Excel, and PowerPoint to assist with preparing lab reports, research papers and presentations.

Middletown Campus	Newburgh Campus
BATCAVERN	BATCAVERN II
Bio-Tech 155	TWR 123
341-4156	341-4504

### Math Resource Labs

The Mathematics Department has two Math Resource Labs that are open to any student enrolled in a mathematics course. It is completely free to students. Just drop in and someone will be happy to help you with your questions. The Math Resource Room hours are posted each semester. Math Resource Rooms are located in Middletown (Harriman Hall, Room 305) and Newburgh (Tower Building, Room 107).

### Education Curriculum Resource Area

The Education Curriculum Resource Area is located on the second floor of the Library. It houses books and periodicals for use by students, including textbooks, fiction and non-fiction titles and Caldecott and Newbury Medal Winners.

### English Department Writing Centers

The English Department Writing Centers serve all students who need to work on writing skills. Students may sign up for writing practice or be referred by their instructors. Some courses also require mandatory weekly hours in the Writing Center. The center operates on the philosophy that students learn to write by writing. Skills instruction is done in the context of the student's own work, generated in the center. Using instructor-created materials, students work individually with English Department instructors and tutors. Computers accommodate various learning styles. Day and evening Writing Center hours are posted each semester. Writing Centers are located in Middletown (Harriman Hall Room 109) and Newburgh (Tower Building, Room 215).

### **The Writing Consultancy Project**

SUNY Orange's Writing Consultancy Project's goal is to help students master their occupational and professional writing and to promote writing across all academic disciplines. Sponsored by the English Department, the project provides writing consultants to specific academic and career programs. The consultant works with the instructor and the students in applying and transferring key writing skills learned in Freshman English 1 to their program-specific and professional writing situations. These consultants teach the students through program-specific technical writing modules, special workshops and individualized conferences. Students are provided a computer-equipped classroom/lab facility (Technical Writing Lab, Bio-Tech Room 260) where much of the individualized instruction takes place. This lab is the site for required course-related work and for drop-in use by students in Writing Consultancy-related courses.

Participating programs and departments whose students earn academic credit by taking ENG 160 and ENG 161 Technical Writing Modules are:

- Telecommunications
- Human Services
- Occupational Therapy Assistant
- Laboratory Technology

In addition, the Writing Consultancy offers special instructional services to other programs such as nursing, with its new nursing and writing courses, dental hygiene, criminal justice, and anatomy and physiology. The Writing Consultancy also conducts special writing workshops for any instructor and class requesting them.

A nationally recognized, award-winning interdisciplinary program, the Writing Consultancy Project was selected as an Outstanding College Occupational Education Program in New York State. It is also featured in the Jossey-Bass publication, "Writing Across the Curriculum in Two Year College Vocational/Career Programs: New Directions for Community Colleges."

### **English as a Second Language**

For incoming students whose primary language is not English and who demonstrate the need to improve their English, the College offers: Course WRT 020, English as a Second Language.

Through the formal placement process, students may be required to take WRT 020 before attempting later college-level study, but students may also take the course as an elective. Working closely with the English Department, students are immersed in reading writing, speaking and listening activities.
